

Caroline Whalley graduated with an Environmental Science degree from Plymouth Polytechnic in 1989. She initially worked as an inorganic chemist at the Water Research Centre, before taking a PhD in environmental chemistry at the University of East Anglia. In 1995 she joined the CEFAS marine environment laboratory, moving in 2004 to Defra (the Department for Environment, Food and Rural Affairs, UK). Within Defra she has worked in various roles, and currently leads on priority substances in surface waters under the Water Framework Directive.
